ACADEMIC PROJECTS

Expense Management System

- Developed a web-based system using Visual Studio Code and XAMPP to track and manage organizational expenses effectively.
- Integrated features like expense categorization, budget monitoring, and detailed reporting to enhance financial oversight and decision-making.

DeepFake Detection of Faces

- Developed a DeepFake Detection System using advanced machine learning techniques, including CNNs and texture-based analysis, achieving over 95% accuracy in identifying manipulated facial images.
- Designed a user-friendly platform with real-time analysis capabilities, leveraging datasets like FaceForensics++ to ensure robust detection of identity swapping and synthetic media generation.
